

Essai Clinique

Généré le 11 mai 2025 à partir de

Titre	Suivi à long terme des participants exposés au GSK3377794 (NY-ESO-1C259T), un traitement par des lymphocytes T génétiquement créés et porteurs d'un récepteur des lymphocytes T ciblant le NY ESO-1
Protocole ID	GSK 208750
ClinicalTrials.gov ID	NCT03391778
Type(s) de cancer	Autre
Phase	Autres
Institution	CENTRE HOSPITALIER DE L'UNIVERSITE DE MONTREAL
Ville	
Investigateur principal	Dr Simon Turcotte
Coordonnateur	Marie Martin 514-890-8000 poste 30737
Statut	Fermé
But étude	This is a non-therapeutic, multi-center, long-term follow-up (LTFU) study of subjects who have, during the interventional study, received GSK3377794 generated by a process that utilizes lentiviral vectors. Subjects enrolled in the interventional studies who complete the interventional study or who withdraw from the interventional study will enter this LTFU study and will be followed for up to 15 years from the infusion of genetically modified T lymphocytes. Subjects can receive other therapies for their cancer while they are being followed for long term safety in this study.
Critères d'éligibilité	<ul style="list-style-type: none">• Subjects who have received at least one dose of GSK3377794 in the interventional study.• Subjects who have either completed the interventional study or have withdrawn from it.• Male or Female subjects.• Capable of giving signed informed consent prior to the study participation.
Critères d'exclusion	<ul style="list-style-type: none">• None
