Titre	NCI COVID-19 in Cancer Patients Study (NCCAPS): A Longitudinal Natural History Study
Protocole ID	ICC.1
ClinicalTrials.gov ID	NCT04387656
Type(s) de cancer	Autre
Institution	CISSS DE LA MONTEREGIE-CENTRE  HOPITAL CHARLES-LE MOYNE 3120 boulevard Taschereau, Greenfield Park, QC, J4V2H1
Ville	
Investigateur principal	Dre Nathalie Daaboul
Coordonnateur	Mariane C. Fugulin 450-466-5000 poste 2465
Statut	Fermé
But étude	This study collects blood samples, medical information, and medical images from patients who are being treated for cancer and have a positive test for SARS CoV-2, the new coronavirus that causes the disease called COVID-19. Collecting blood samples, medical information, and medical images may help researchers determine how COVID-19 affects the outcomes of patients undergoing cancer treatment and how having cancer affects COVID-19.
